

# Surge Protectors Splash Baffles

MULTI-CATEGORY PRODUCT

**Bolt-On UHMWPE Surge Protector**  
Part Number: HSSPRD638

Corrosion-resistant, full-face flanged surge protectors tighten down evenly and help keep fluids from directly contacting relief valves and rupture disks.

## FEATURES & BENEFITS

- AAR compliant design
- Economical and low maintenance
- Fully welded construction and lightweight
- Concentric serrated gasket surfaces
- Drop-in and flanged bolt-on styles available
- Round or square flange options available
- Alternate configurations available

## TANK SLOSH PROTECTION

Designed to protect rupture discs and relief valves from the powerful sloshing forces of commodity inside a tank cars. Surge protectors offer a barrier of protection while still allowing air to travel past, allowing quick inspections and relief valves to perform properly.

## PURPOSE BUILT

Salco Products offers Surge Protectors in a variety of configurations and materials depending on its' intended application. Drop-in baffles for Quick Inspects and bolt-on surge protectors available. See Salco website for a full list of materials and configurations available.
