FIRE SAFE (GRAPHITE PACKING AND SEALS) OR FIRE SAFE OPTION

73A-100 SERIES

THREADED, 2-PIECE, STANDARD PORT, FORGED CARBON STEEL BALL VALVE

AAR Approval No. E119022

Apollo 73A-100 series valves are two-piece ball valves with a forged body design. Blowout proof stem design is standard, as are RPTFE seats, adjustable graphite packing, and tack welds to ensure the retainer is not removed from the body. For the 1/4" - 1" sizes, the pressure rating is 2000 psig. For the 1-1/4" - 2" sizes, the pressure rating is 1500 psig. This series is API 607 Fire Safe.

76-100 SERIES

THREADED, 2-PIECE, STANDARD PORT, STAINLESS STEEL BALL VALVE

AAR Approval No. E119022

Apollo 76-100 series valves are two-piece ball valves that feature standard ports. This series is an ideal solution for transportation applications. These valves feature an A351 CF8M stainless steel body and investment cast components for high performance and extended service life. The 76-100 series ranges in size from 1/4" - 3". For the 1/4" - 1" sizes, the pressure rating is 2000 psig. For the 1-1/4" - 2" sizes, the pressure rating is 1500 psig. For the 2-1/2" and 3" sizes, the pressure rating is 1000 psig. Blowout proof stem design, adjustable graphite stem packing, stainless steel levers, and tack welds are standard on this series. This series is API 607 Fire Safe.

76F380 SERIES

FLANGED X THREADED, 2-PIECE, FULL PORT, STAINLESS STEEL BALL VALVE

AAR Approval No. E202151

The Apollo 76F-380, Threaded x Flanged series ball valves are two-piece construction with a full port design. This series is an ideal solution for transportation applications. These valves feature an A351 CF8M stainless steel body and investment cast components for high performance and extended service life. Sizes include 2" and 3" NPT with a pressure rating of 275 psig. The threaded NPT body end meets ANSI B1.20.1 and the flanged end meets ANSI B16.5, Class 150 raised face flange requirements. Blowout proof stem design, adjustable graphite stem packing, stainless steel levers, and tack welds are standard on this series. Full perimeter body joint seal welding is available. This series is API 607 fire safe.

89-100 SERIES

THREADED, 2-PIECE, STANDARD PORT, CARBON STEEL BALL VALVE

AAR Approval No. E119022

Apollo 89-100 series valves are two-piece ball valves with an investment cast design. Blowout proof stem design and tack welds are standard, as are RPTFE seats and adjustable graphite packing. The 89-100 series ranges in size from 1/4" through 3". For the 1/4"-1" sizes, the pressure rating is 2000 psig. For the 1-1/4"-2" sizes, the pressure rating is 1500 psig. For the 2-1/2" and 3" sizes, the pressure rating is 1000 psig. This series is API 607 Fire Safe.

96-100 SERIES

THREADED, UNIBODY, STANDARD PORT, STAINLESS STEEL BALL VALVE

AAR Approval No. E202150

Apollo 96-100 series ball valves are unibody valves with investment cast construction. The unibody design prevents accidental disassembly of the valve during maintenance or piping repair. Blowout proof stem design is standard, along with RPTFE seats and adjustable graphite packing. For the 1/4" - 1" sizes, the pressure rating is 2000 psig. For the 1-1/4" - 2" sizes, the pressure rating is 1500 psig. This series is API 607 Fire Safe.

87A/88A-10X SERIES

STANDARD PORT CLASS 150 FLANGED BALL VALVE | 1-1/2" - 4"

AAR Approval No. E152111

Apollo 87A-100 and 88A-100 series ball valves are quickly becoming the industry's preferred flanged ball valve choice. These standard port ASME Class 150 ball valves feature a blowout proof stem design, an ISO 5211 actuator mounting pad, and a dual position lock plate that meets OSHA lockout/tagging regulations. Standard features include a grounded ball and stem, ball vented in the stem slot, and a heavy duty gland plate. Flexible lip seal seats made of a TFM compound are standard for this series. These seats ensure sealability at both low pressure and high pressure, low temperature and high temperature, and reduce operational torque in all situations. A spiral wound graphite gasket is also standard on this series. Apollo 87A-100 and 88A-100 series valves certified by AAR are available in sizes up to 4". This series is API 607 Fire Safe.

FULL PORT CLASS 150 FLANGED BALL VALVE | 1" - 6"

AAR Approval No. E152112

Apollo 87A-200 and 88A-200 series ball valves are quickly becoming the industry's preferred flanged ball valve choice. These full port ASME Class 150 ball valves feature a blowout proof stem design, an ISO 5211 actuator mounting pad, and a dual position lock plate that meets OSHA lockout/tagging regulations. Standard features include a grounded ball and stem, ball vented in the stem slot, and a heavy duty gland plate. Flexible lip seal seats made of a TFM compound are standard for this series. These seats ensure sealability at both low pressure and high pressure, low temperature and high temperature, and reduce operational torque in all situations. A spiral wound graphite body gasket is also standard on this series. Apollo 87A-200 and 88A-200 series valves certified by AAR are available in sizes up to 6". This series is API 607 Fire Safe.

FLANGED X CAM, FULL PORT, STAINLESS STEEL BALL VALVE

87A-378 - 2" 87A-370 - 3"

AAR Approval E152113

Apollo 87A-37x series valves are A351 CF8M stainless steel ball valves with cam end x ANSI 150 flanged connections. Standard features include blowout proof stem design and adjustable graphite packing. These valves also feature standard position locking devices, anti-static grounding devices for the ball and stem, and ISO 5211 actuator mounting pads.

Primary uses for this type of valve include the loading and unloading of tank cars, and these valves have additional features build-in to address this application. The ball is vented at the stem slot to relieve thermal expansion of volatile media in the body cavity; firesafe construction to guard against leakage in the event of an accident; special norise handles enable installation in tight places; and full-port design maximizes flow and minimizes load/unload times. The valves are of bolted construction, so they are repairable to ensure leakproof installation/operation and can be disassembled for complete cleaning or replacement of all interior surfaces and parts. The Apollo 87A-37x series is available in 2" and 3" sizes. This series is API 607 Fire Safe.

AAR Approval No. E152113

Apollo 87A-38x series valves are A351 CF8M stainless steel ball valves with NPT threaded end x ANSI 150 flanged connections. Standard features include blowout proof stem design and adjustable graphite packing. These valves also feature standard position locking device and anti-static grounding device for the ball and stem, and an ISO 5211 actuator mounting pad.

Primary uses for this type of valve include the loading and unloading of tank cars, and these valves have additional features built-in to address this application. The ball is vented at the stem slot to relieve thermal expansion of volatile media in the body cavity; firesafe construction to guard against leakage in case of an accident; a special no-rise handle enables installation in tight spaces; and full-port design maximizes flow and minimizes load/unload times. The valves are of bolted construction, so they are repairable to ensure leakproof installation/operation and can be disassembled for complete cleaning or replacement of all interior surface and parts. The Apollo 87A-38x series is available in the 1", 2", and 3" sizes.

AAR Approval No. 202149

The Apollo 87A-TPA and 88A-TPA valves are full port, 4 inch, bottom outlet valves designed specifically for tank car application. Standard features include a blowout proof stem design and adjustable graphite stem packing. Each valve completes a body shell test, seat test, and cycling test prior to shipment.
