

## Top Filters and Seals

Protection for Hatch Cover Openings

**Proven protection against contaminants during transit and unloading.**

### Solid Plastic Bonnets

- Made of high strength polyethylene; eliminates dust and contaminants.
- Available in 30", 40" and 50" diameters.

### 20" Framed Filters

- Keeps insects, bees and other contaminants out of the load.
- The railcar breathes, reducing condensation problems.
- Available in 30 micron or 600 micron (sold 20 per box).
- 600 micron filter can be used to hold fumigant packs/strips.
- 30" holder available for larger openings; 20" framed filters snap right in.

### Filter Bonnets

- Available in 20" or 30".
- Allows ventilation of clean cars while keeping them sanitary.
