TKS2024A
Assembly with 600
micron screen filter

Salco's filter/fumigant holder provides a light-weight but sturdy option for filtering railcars with trough style openings.

- 20"x24" size will fit any trough hatch coaming width.
- More than one holder can be placed side by side for full trough length filtering protection.
- Center filter is replaceable. Comes in 30 micron or 600 micron filter media.
- Use them to ventilate clean or newly painted/lined railcars to keep them sanitary and free of dust or debris.
- Approved for use with food; made from FDA grade materials.
